# CONTENTS

Volume 25  No. 4  |  Winter 2021

**Editorial:** International Collaboration in Science and Mathematics Education  
Sarah Quebec Fuentes and Mark A. Bloom  

## RESEARCH / EMPIRICAL

Mathematical Representations in the Teaching and Learning of Geometry: A Review of the Literature from the United States  
Siddhi Desai, Sarah B. Bush, and Farshid Safi  

Impact of a Summer Camp on Elementary Students’ Understanding and Awareness of Engineering Careers and Attitudes Toward Engineering  
Drew Gossen, Rebekah Hammack, and Juliana Utley  

General Proof Tasks Provide Opportunities for Varied Forms of Reasoning about the Domain of Mathematical Claims  
Kimberly A. Conner and Samuel Otten  

## PRACTICE / THEORETICAL

Conversations with Scientists and Science Educators: In Search of the Third Dimension  
Gareth Price and Stuart Bevins  

Broadening Conceptions of STEM Learning: “STEM Smart Skills” and School-Based Multilingual Family Engagement  
Emily Suh, Lisa Hoffman, and Alan Zollman
